

## Math Placement

The University of Pittsburgh at Titusville requires an ALEKS Placement, Preparation and Learning (ALEKS PPL) Assessment to determine readiness for mathematics courses. ALEKS PPL is a web-based program that uses artificial intelligence to map a student's strengths and weaknesses. The Placement Assessment is up to 30 questions and generally takes 60-90 minutes to complete. After the Placement Assessment, an individualized Prep and Learning Module is available for students to refresh their knowledge on forgotten topics. Students then have the opportunity to reassess and improve their placement.

ALEKS consists of three parts:

- An Initial Placement Assessment
- The Prep and Learning Module, an individualized, self-paced online review
- Access to two additional Placement Assessments

The University of Pittsburgh at Titusville encourages each student to spend time in the Prep and Learning Module, even if the desired score is achieved, because time spent in ALEKS will ultimately lead to better preparation and improved grades.

**What is the purpose of placement testing?** The Placement Assessment results will be used to determine the most appropriate courses for each student as they move forward with college coursework. After taking a Placement Assessment, students should meet with their advisor to review their results and enroll in the best classes based on their scores.

This is a "Placement Assessment," not a test. The difference is that a Placement Assessment is designed to determine what a student knows and what a student needs to work on. At the end of the ALEKS PPL Assessment, a student will have a much better sense of his/her strengths and weaknesses in math. Students then have a chance to brush on topics that may have been forgotten or haven't been practiced for some time.

**Be honest.** It is important that the Placement Assessment is taken seriously and each student gives it an honest effort so that the Placement Assessment truly reflects their current level of knowledge and math preparedness. There is no benefit to cheating on the Placement Assessment – the only result will be that a student enrolls in a class that is too difficult, or not challenging enough, potentially costing time and money. Therefore, while taking the Placement Assessment, students should not consult any outside sources for help (friends/family, internet searches, textbooks, notes etc...). The purpose of the Placement Assessment is to give an accurate measure of a student's current mathematical knowledge state so that he/she will be successful in mathematics courses. The placement exam is governed by the University of Pittsburgh policies on academic integrity as discussed in the course catalogue <http://catalog.upt.pitt.edu/content.php?catoid=4&navoid=438>.

## FAQs

## Preparation

**Why must I take the ALEKS PPL Assessment?** The Placement Assessment is used to determine the mathematics course in which you will have the greatest success. Upon completion of the Placement Assessments, your scores are sent to your academic advisor. Your advisor will review your scores and help make appropriate recommendations for course registration.

**Who has to take the ALEKS PPL Assessment?** All students who enter the University of Pittsburgh at Titusville must take a placement assessment for mathematics courses. The only exception is for students who have college or university transfer credit that is equivalent to MATH 0029, MATH 0030 or that meets or exceeds the general education mathematics requirements of the University.

**When do I take the ALEKS PPL Assessment?** Students normally will complete the proctored assessment placement during a Student Testing and Registration Day (STAR Day) before the beginning of each term. Students can also arrange to take the assessment placement by scheduling an appointment with the Department of Admissions by calling 814-827-4509 or 888-878-0462. Students can also complete the assessment during the new student orientation for each semester.

STAR Dates for students beginning classes Fall 2017 are:

Saturday, April 8

Saturday, May 20

Saturday, June 24

Friday, July 21

New Student Orientation for the fall semester is August 24 to 27.

### **Where can I take my Placement Assessment?**

We strongly recommend that you take your first placement assessment at home before you take the second proctored assessment at the University of Pittsburgh at Titusville. The first placement assessment is a chance for you to experience the placement assessment and to see where you initially place. It also provides you an opportunity to complete any of the ALEKS Preparation and Learning Modules before you take the second assessment.

The second assessment is completed at the University of Pittsburgh at Titusville in a proctored environment. The results of this assessment are used to place you into the mathematics course in which you will be the most successful during your first semester at college.

If you do not place into the mathematics course of your choosing, you have the possibility to complete a third assessment. You, however, must wait at least 48 hours before taking the next proctored assessment and you must complete the ALEKS Preparation and Learning Modules that are assigned to you. If you do not complete the ALEKS Preparation and Learning Modules, you will not be allowed to take the third assessment.

**Is there a fee for using ALEKS PPL?** There is no fee for completing the assessment placement.

**Do I need to install any software or plug-ins prior to taking the ALEKS Placement Assessment?** No.

There are no required plug-ins or applets required with your use of ALEKS PPL. As long as you have access to the internet and are using an updated browser, you should not experience difficulties in taking your Placement Assessment. For a list of preferred browsers, please review the ALEKS system requirements on their support site: [http://www.aleks.com/support/system\\_requirements](http://www.aleks.com/support/system_requirements)

**What topics are covered during the ALEKS PPL Assessment?** ALEKS PPL is an online, adaptive system that covers a broad spectrum of mathematics topics. The length of the Placement Assessment will vary, but can be up to 30 questions. You will see some, but not all, of the math you have learned in high school. It is a Placement Assessment, not a preview of math courses at the University of Pittsburgh. It is designed to identify if you are prepared for a particular course. After you take your first Placement Assessment, you will have the opportunity to review and master additional topics to reassess and improve your placement.

Topics covered:

- Real numbers (including fractions, integers, and percentages)
- Equations and inequalities (including linear equations, linear inequalities, systems of linear equations, and quadratic equations),
- Linear and quadratic functions (including graphs and functions, linear functions, and parabolas), exponents and polynomials (including integer exponents, polynomial arithmetic, factoring, and polynomial equations), rational expressions (including rational equations and rational functions)
- Radical expressions (including higher roots and rational exponents)
- Exponentials and logarithms (including function compositions and inverse functions, properties of logarithms, and logarithmic equations)
- Geometry and trigonometry (including perimeter, area, and volume, coordinate geometry, trigonometric functions, and identities and equations).

**Can I practice using the ALEKS input tools before I begin the Placement Assessment?** ALEKS will begin with a brief tutorial to make sure you are comfortable with the math palette tools before your Placement Assessment begins. The tutorial shows you how to enter different types of answers, how to use the ALEKS calculator, and how to graph. If you aren't sure how to input an answer, or need help while you are taking the ALEKS Placement Assessment, select the **Help** button below the answer pallet tools. Going to the tutorial during your Placement Assessment will NOT impact your Placement Assessment results.

## Taking the Placement Assessment

**What is the format of the questions on ALEKS?** ALEKS is not a multiple-choice Placement Assessment. It is open-response and requires you to work out solutions with a paper and pencil, then enter them into ALEKS. Be sure to have scratch paper with you.

**May I use a calculator while using ALEKS?** ALEKS will provide an on-screen calculator if you need one to complete a particular problem. Otherwise, you may not use a calculator.

**May I use any other resources during a Placement Assessment?** You may only use a pen or pencil, paper, and the resources provided within ALEKS. You should not receive assistance from friends, family, other websites, textbooks, or any other resource not provided by ALEKS. Using outside resources will lead to improper placement and potentially course failure. It is also a violation of the institution's academic integrity policies.

**Can I review a question after I've answered it?** Because ALEKS is adaptive, once you submit an answer, you cannot change it. Be sure to carefully check your answer before submitting your response.

**What if I see questions I don't know?** It is likely that you will be asked questions on material you have not yet learned. On such questions it is appropriate to answer, **I don't know**. On any question that you have familiarity with, however, it is important to do your best. **I don't know** is interpreted by ALEKS to mean that you do not know how to solve the topic, and this will be reflected in the Placement Assessment results. There is no penalty for incorrectly answering a question on the Placement Assessment, it only helps ALEKS understand what you know and don't know.

**Are Placement Assessments timed?** You are free to complete the First Placement Assessment at your own pace. The system will allow you to access your First Placement Assessment for 48 hours. If you need to exit the Placement Assessment for any reason, you will be able to log back in and pick up where you left off.

Time is limited for the second and third assessments. You have two hours to complete those proctored assessments at the University of Pittsburgh at Titusville.

**What happens if I do not complete a Placement Assessment in the allotted time?** If the Placement Assessment is unproctored, you will have to restart the Placement Assessment. If the incomplete Placement Assessment is proctored and timed, you will be given a placement result, but it will not be a true reflection of your abilities.

**I am ready to start my First ALEKS PPL Assessment. How do I begin?** You will receive a letter or e-mail from the University providing you necessary information to begin the first assessment placement at home.

## Placement Result

**What is my placement result?** Your placement result (overall score) is a number between 0 and 100. It represents the percentage of topics ALEKS has identified you have mastered.

Course placement is determined as follows:

Course Number	Course Name	ALEKS Score Range
MATH 0029	Fundamentals of Mathematics 1	0 to 29

MATH 0030	Fundamentals of Mathematics 2	30 to 45
MATH 0031	College Algebra	46 to 60
MATH 0110	Fundamentals of Mathematics	46 to 60
MATH 0200	Preparation for Scientific Calculus	61 to 75
MATH 0220	Analytical Geometry and Calculus I	76 to 100

**Where can I see my score?**

- You will receive your score immediately upon completion of your Placement Assessment.
- Your ALEKS score can be viewed by re-entering ALEKS using the same access link for which you took the Placement Assessment.

**How long is my placement result valid?** Your placement result is valid for up to 12 months.

**What if I do not place into the course I wanted?** This is a perfect opportunity to take advantage of the Prep and Learning Modules offered within ALEKS PPL. An individualized study plan will be created based on your performance on the Initial Placement Assessment. ALEKS will identify what you know and what you are ready to learn next so you can brush up on lost knowledge.

**I did not place into the class I wanted. Can I take it anyway?** No, you must achieve the minimum placement result to take each corresponding class.

**What if I placed into the class I wanted?** Congratulations! Continue to use your Prep and Learning Module to improve your chances for success. The placement result required is the minimum preparation for your course. Take advantage of the individualized review and learning features in ALEKS to get a better grade in your class.

**Can I retake the ALEKS PPL Assessment?** Yes, you may take up to three Placement Assessments. However, to make each attempt worthwhile, it is important that you spend time working in your ALEKS Prep and Learning Module between Placement Assessments so that you can improve your skills. After you take an assessment placement ALEKS will automatically assign you Preparation and Learning Modules to complete.

**Can I retake the ALEKS Placement Assessment immediately?**

You must wait 48 hours between Placement Assessments. You are required to complete the preparation and learning modules before taking another assessment. There is generally no benefit to re-taking the Placement Assessment immediately after completing a prior attempt. You cannot improve your results

by simply re-taking the Placement Assessment without spending time in the Prep and Learning Module to refresh material that you may have forgotten.

## Prep and Learning Modules

**How long do I have access to my Prep and Learning Module?** You will have six months of access to your Prep and Learning module. Access to the prep course will not begin until you select **start** on the top of your screen. DO NOT select into the Prep and Learning Module until you are ready to start working.

**Is there an additional fee for my Prep and Learning Module?** No, there is no fee to access the Prep and Learning Modules.

**Must I work in my ALEKS Prep and Learning Module between Placement Assessments?** You can retake the Placement assessment up to two additional times to improve your score. (The highest score on a proctored assessment will be used for math placement). Students are required to work in the Prep and Learning Modules for a specific amount of time prior to each Placement Assessment to increase success.

- 2nd attempt—required to complete 3 hours of work in the Prep and Learning Modules before attempting assessment.
- 3rd attempt—required to complete 3 additional hours of work in the Prep and Learning Modules before attempting assessment.

**What are ALEKS Knowledge Checks?** While working in a Prep and Learning Module, you will periodically complete a Knowledge Check to make sure you have mastered the topics you gained in Learning Mode. If you do not show mastery during the Knowledge Check, the topics will be added back into your Learning Pie so you can review them again.

**Does progress in an ALEKS Prep and Learning Module count toward placement?** No. You must complete a new Placement Assessment to change your placement result.

**Can I change to a different Prep and Learning Module later?** No. You may only use one Prep and Learning Module. If you are unsure which module to select, use the module recommended by ALEKS.

## Technical Support

**What do I do if my web browser gets stuck or my computer crashes while I'm taking the Placement Assessment?** Simply close the browser, or log out and log back in. ALEKS will resume the Placement Assessment exactly where you left off, with no loss of your previous answers.

**Where can I get help with ALEKS?**
